

The S&A Small Business Alliance

The S&A Small Business Alliance brings you the power, experience, and expertise of seven of the best small companies in the environmental business. As a team, this group of companies offers you capabilities in all areas of environmental engineering and consulting, remediation, infrastructure design, environmental planning, UXO and EOD services, and specialized metals treatment technologies. Additionally, our Minority Institution partner, Florida International University, brings R&D, technology evaluation, and laboratory capabilities to the S&A team.

Each of the firms in the S&A Small Business Alliance represents decades of experience in Air Force, Navy, Army, and other DoD projects. The depth and breadth of experience and the synergy of this team rivals that of the huge engineering firms. When you select the S&A Small Business Alliance for your projects, you get the power of a big company from a group of small businesses that truly have your best interest at heart. Our goal is to establish and maintain long term relationships with our clients, to help your programs be successful, and to instill a confidence in you that will make you want to work only with these firms.

Specific examples of the experience and capabilities of the members of the S&A Small Business Alliance include:

- ◆ **S&A Environmental Consultants, LLC** is a Service Disabled Veteran-owned Small Business with its main office in a SBA certified HUBZone. S&A's owner and employees represent years of experience in Air Force programs including environmental restoration, compliance, planning, and pollution prevention; information technology; and construction management. S&A's employees have performed literally hundreds of Air Force projects including air quality, water quality, pollution prevention, and ECAMP support.
- ◆ **Bechtel-S Corporation** brings strong capabilities and extensive Air Force experience in environmental remediation to the team. Additionally, Bechtel provides capabilities in the areas of environmental planning and compliance, infrastructure design and construction management. Bechtel's personnel have assisted every Air Force Command in programs such as Administrative Record and RAB support and all phases of the Environmental Restoration Program.
- ◆ **Geo-Marine, Inc. (GMI)** is an engineering and environmental firm with more than 17 years of success in delivering high quality environmental services to the Air Force and DoD. In addition to being one of the strongest companies performing environmental planning and NEPA projects, GMI has strong capabilities in remediation and operations and maintenance of environmental systems. GMI's staff of Air Force experienced managers, technicians, and support staff have completed projects at 82 USAF bases in 43 states.
- ◆ **SCI UXO/OE Services** is an 8(a) woman-owned small business that provides detection, removal, and safe disposal of conventional and chemical unexploded ordnance/ordnance explosives. SCI's services include UXO/OE avoidance, site assessment and investigation, construction support, removal actions, and range clearance and maintenance.
- ◆ **Metals Treatment Technologies, LLC (MT²)** is a business specializing in providing innovative and economical solutions for the treatment and remediation of heavy metals contamination found in wastes and soil. MT² was formed to offer the professional services of its highly qualified technical staff and broad portfolio of proprietary and patented technologies. MT² operates a treatability laboratory in Wheat Ridge, Colorado and provides clients with tailored metals solutions that are optimized for each specific project.
